## BOSS RV ANTIFREEZE

---

### Customer Benefits:

BOSS RV antifreeze is formulated with propylene glycol which is safer than conventional ethylene glycol anti-freeze as it is less toxic and therefore safer for people, pets and wildlife if accidentally ingested.

### PERFORMANCE SPECIFICATIONS:

| <u>Blend formulation</u> | <u>Volume %</u>   |
|--------------------------|-------------------|
| Propylene Glycol         | 35.52%            |
| Additive CLSAP           | 1.48%             |
| DI Water                 | 63.00%            |
| <hr/>                    |                   |
| Total                    | 100.00 %          |
| BURST Protection         | -50° F (-45.6° C) |

### Applications:

- Safer for people and pets
- Helps protect wildlife in the environment
- Down-hole applications for equipment flushing of hoses and piping
- Phosphate free formula
- To be utilized for RV plumbing applications as well as winter applications in
- marine inboard engines and stern drive applications
- Burst protection to -50 F (-45.6 C)

**NOTE:** This product is NOT to be used in automotive or diesel engines radiator applications.
