

Euro 5W40 Synthetic

PRODUCT DESCRIPTION & BENEFITS

It's all about superior protection and performance. BOSS Lubricants' Euro 5W40 Synthetic motor oil has been formulated to meet, and exceed, demanding motor oil performance requirements for both European and North American passenger cars, SUVs, vans and light trucks powered by gasoline or diesel engines.

As a full synthetic oil, BOSS Euro 5W40 Synthetic provides critical engine wear protection during low-temperature startup, and has been designed to handle extreme hot and cold driving conditions such as frequent short trips, stop-and-go and heavy loads.

This fuel-saving synthetic motor oil is produced with high-quality synthetic base oils, and has been engineered to:

- Optimize horsepower and acceleration, particularly in higher-RPM and turbocharged engines.
- Improve fuel mileage.
- Provide better engine protection, with a strong film barrier that controls friction.

BOSS Euro 5W40 Synthetic meets or exceeds specifications for multiple major European automakers, including:

- BMW LL-01
- Chrys MS-12991, MS-10725
- Mercedes Benz 229.3 / 229.5
- OPEL GM-LL-B-025
- Peugeot PSA B71 2296
- Porsche A40
- Renault RN0700 / RN0710
- Volkswagen 502.00 / 505.00
