

ALL SEASON TDH TRACTOR FLUID

This multi-functional, low viscosity fluid has been formulated specifically for tractors using a centralized system to lubricate the transmission differential wet break, power steering and hydraulic systems. Outstanding frictional properties provide chatter free operation of the wet breaks, prolonging the life of the oil seals, hydraulic hoses and other rubber parts while also protecting gears, pumps and other parts from high load wear. Recommended for equipment with common transmission, hydraulic, final drive and wet break pumps where intermixing may occur due to implement attached.
